

Windows Server 2012 and 2012 R2 will no longer have extended support from Microsoft on - October 10, 2023. Keep your organization compliant and safe by migrating these licenses to Azure before time runs out!

Weeks 1 - 4

Weeks 4 - 6

Weeks 6 - 10

Assessment 

Our cloud experts assess your needs and advise on the best options for your environment & goals.

1

Migration 

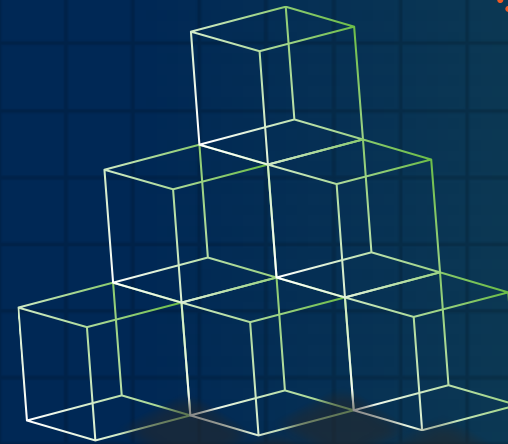

We create a customized migration plan and finalize the cutover steps, date and rollback plan. Then the migration begins!

2

Configuration 

We'll configure the environment to your specific requirements and do functional & performance testing.

3

Optimization 

Our experts will optimize the new environment and the final cutover will be completed.

4

Maintenance 

We create a maintenance & support plan so your new environment is properly monitored & maintained.
