

# Managed IT Services

## Optimized at Every Level.

More than simply a technology provider, we're problem solvers. Whether you need a completely new network or simply an improvement, our team can help. The word "partner" is used a lot these days, but we truly partner with our clients, putting relationships over transactions. When you optimize the way your business uses technology by collaborating with hands-on experts, the sky's the limit. BT Partners consultants are deeply invested, offering the practical expertise & seamless support your business needs to be successful.

### Systems Monitoring

We proactively implement solutions to improve performance and constantly monitor all critical network components to detect and resolve potential threats faster.

### Virtualization / Cloud

We help you increase IT agility, flexibility, & scalability while creating significant cost savings by constantly looking for emerging tech to give you a competitive advantage.

### Security

We proactively maintain your systems by leveraging the latest cybersecurity tools to keep your data secure, whether it's on your servers or in the cloud.

### IT System Assessment

A detailed engagement analyzing your system for vulnerabilities, including security, patches, documentation, processes, and best practices.

### Server / Desktop Support

From single PC installation to group-wide software updating, we optimize your technology - improving reliability while ensuring an enjoyable user experience.

### Back-up / Disaster Recovery

Our Back-Up/Disaster Recovery (BDR) solutions can reduce your downtime from hours to minutes, ensuring critical applications are always available to you.
