Sage Intacct

Optimized at Every Level.

A powerful cloud-based financial management system with built-in tools and automated processes to accelerate your company's success & growth. While Sage Intacct is a best-in-class platform, we realize a lot of solutions are similar. When you combine Sage Intacct with BT Partners, you get the lowest risk and highest ROI. Our consultants are deeply invested, offering practical expertise and seamless support. Our delivery team is fully involved in the sales process, so there are no hand-offs and everyone is accountable.

Dimensions

Built-in from the start, dimensions can be departmental or individual, so you can slice & dice, and analyze your data without a highly segmented chart of accounts.

Direct Integrations

From the very beginning, Sage Intacct was designed to be best in class, with a fully open API. This allows for direct integrations with any solution that also has an open API.

Budgeting & Planning

Providing increased control, collaboration and security, Sage Intacct allows you to examine all potential what-ifs & scenarios so you can focus on strategic opportunities.

Enhanced Reporting

Financial statements are standard, but Sage Intacct provides native tools & dashboards so you can transform data into better knowledge & easier decision making.

Multi-entity Management

Uniquely equipped to support multi-location & multi-entity companies, with configurable rules & automated inter-entity transactions, Sage Intacct improves efficiency & insight.

References

We are fully referenceable, with many clients ready to share experiences of our experts partnering from implementation onward, with training, support, & guidance.
