

Domo

Optimized at Every Level.

A complete integrated platform that not only stores, cleans and prepares the data in all of your systems, but provides detailed analysis through visualizations, predictive models, and KPI forecasting. BT Partners understands the value of Business Intelligence and data visualization, and has witnessed the impact it has on a business' bottom line. We help you leverage the powerful integrated functionality of Domo, while empowering your team to make data-driven decisions that increase profitability and your ROI.

Comprehensive Solution

Domo connects, stores, organizes, and analyzes your data, so you can easily visualize & share it, without needing other solutions or tools.

Connection & Integration

Domo's Connector Library has 1500+ prebuilt API connectors to quickly integrate systems for more visibility. If one isn't available, we can easily build it for you.

Scalability

We have clients leveraging Domo ranging in revenue from \$9 million to \$2 billion. The price & scalability adapts and supports you through growth & changes.

Self-Services System

We show clients where their company can go with data, but once set up, clients can be fully self-sufficient or we can provide continued support & guidance.

Single Source of Truth

Domo gathers, filters, & combines data from all of your systems, so you can create interdepartmental or multi-entity reports with one source for informed decisions.

Mobile Access

While many tools offer mobile apps, with Domo you can run your business your phone, with the same dashboards and visual tools no matter where you are.
