

Infor CSI

Optimized at Every Level.

An enterprise cloud ERP solution built specifically for manufacturers and distributors, then optimized at every level by our consultants dedicated to improving your processes & achieving your goals. With BT Partners' decades of industry experience, we can ensure you boost performance and efficiency with Infor CSI while also transforming business processes and outdated mindsets. We leverage technology, but put relationships before transactions so your company can thrive and achieve your goals with confidence.

Mature, Multi-tenant Cloud

Infor CSI was created in a global cloud with all features & capabilities easily available, so you have deep manufacturing functionality anywhere, anytime.

Built-in Capabilities

While it offers an open API, with Infor CSI you rarely need third party solutions as it's all built-in, from the CPQ, to finance, to manufacturing.

Infor OS Platform

A user-friendly operating system that accelerates innovation, so you can make personalizations that stay through all upgrades - no developer skills needed.

Clear Supply Chain

Leverage centralized purchasing, inventory, and multi-site warehouse management to improve collaboration, efficiency, and profitability up & downstream.

Industry Expertise

With decades of optimizing ERPs & technology for manufacturers & distributors, our dedicated consultants bring a wealth of knowledge you can leverage.

Infor Birst BI

With pre-built industry and role-specific metrics, Birst simplifies business intelligence for everyone from the manufacturing floor to the boardroom.
